

Tablet Graphic Holder

April 2005

T2B Tablet with existing insert

Press suction cup to tablet face

Remove face with magnetic strips from back plate

Put in new insert and replace face

The Tablet sign holder was developed for locations where public safety or other critical considerations require tightly controlled access to sign inserts. The information displayed looks permanent yet inserts can be changed and updated in seconds using the tool provided.

Tablet signs are tough and made to last. The 16 gauge steel frame and absence of exposed hardware make

these signs extremely resistant to vandalism.

Minimal and sophisticated in design, Tablet signs have high quality detailing, are easy to install and maintain, and are affordably priced.
